Lisa Rosendahl

#GreeningDH – Literaturempfehlungen zum Thema KI (Stand März 2025)

Für den Einstieg

"Maximal Computing" (9. November 2022), in: *DHCC Toolkit*, online: https://sas-dhrh.github.io/dhcc-toolkit/toolkit/maximal-computing.html (abgerufen am 3. März 2025).

"Wie nachhaltig ist meine KI?", in: *sustAIn* 3 (2023), online: https://sustain.algorithmwatch.org/wie-nachhaltig-ist-meine-ki/ (abgerufen am 3. März 2025).

Berichte

International Energy Agency (IEA), *World Energy Outlook 2024*, Paris 2024, online: https://www.iea.org/reports/world-energy-outlook-2024 (abgerufen am 3. März 2025).

Organisation for Economic Co-operation and Development (OECD), *Measuring the environmental impacts of artificial intelligence compute and applications: The AI footprint*, Paris 2022 (= OECD Digital Economy Papers 341), DOI: <u>10.1787/7babf571-en</u>.

Tools

Boris Ruf, "carbon-footprint-modeling-tool", online: https://github.com/borisruf/carbon-footprint-modeling-tool (abgerufen am 3. März 2025).

GenAI Impact, "ecologits", online: https://github.com/genai-impact/ecologits (abgerufen am 3. März 2025).

Wissenschaftliche Beiträge

Verónica Bolón-Canedo u. a., "A review of green artificial intelligence: Towards a more sustainable future", in: *Neurocomputing* 599 (2024), DOI: <u>10.1016/j.neucom.2024.128096</u>.

Loveleen Gaur u. a., "Artificial intelligence for carbon emissions using system of systems theory", in: *Ecological Informatics* 76 (2023), DOI: <u>10.1016/j.ecoinf.2023.102165</u>.

Alexandra Sasha Luccioni, Yacine Jernite, Emma Strubell, "Power Hungry Processing: Watts Driving the Cost of AI Deployment?", in: *FAccT '24: Proceedings of the 2024 ACM Conference on Fairness, Accountability, and Transparency*, hrsg. von Association for Computing Machinery (ACM), New York 2024, S. 85–99, DOI: 10.1145/3630106.3658542.

Alexandra Sasha Luccioni, Emma Strubell, Kate Crawford, "From Efficiency Gains to Rebound Effects: The Problem of Jevons' Paradox in AI's Polarized Environmental Debate", in: *ArXiv* (2025), DOI: 10.48550/arXiv.2501.16548.

Clément Morand, Anne-Laure Ligozat, Aurélie Névéol, "How Green Can AI Be? A Study of Trends in Machine Learning Environmental Impacts", in: *ArXiv* (2024), DOI: 10.48550/arXiv.2412.17376.

Anne Pasek, Hunter Vaughan, Nicole Starosielski, "The world wide web of carbon: Toward a relational footprinting of information and communications technology's climate impacts", in: *Big Data & Society* 10 (2023), H. 1, DOI: <u>10.1177/20539517231158994</u>.

David Patterson u. a., *The Carbon Footprint of Machine Learning Training Will Plateau*, *Then Shrink*, o. O. 2022, DOI: 10.48550/arXiv.2204.05149.

Pengfei Li u. a., "Making AI Less ,Thirsty": Uncovering and Addressing the Secret Water Footprint of AI Models", in: *ArXiv* (2023), DOI: <u>10.48550/arXiv.2304.03271</u>.

Gunnar Schomaker, Stefan Janacek, Daniel Schlitt, "The Energy Demand of Data Centers", in: *ICT Innovations for Sustainability*, Bd. 310, hrsg. von Lorenz M. Hilty und Bernard Aebischer, Cham 2015 (= Advances in Intelligent Systems and Computing), S. 113–124, DOI: 10.1007/978-3-319-09228-7 6.

Roy Schwartz u. a., "Green AI", in: *Commun. ACM*, 63 (2020), H. 12, S. 54–63, DOI: 10.1145/3381831.

Emma Strubell, Ananya Ganesh, Andrew McCallum, "Energy and Policy Considerations for Modern Deep Learning Research", in: *Proceedings of the AAAI Conference on Artificial Intelligence* 34 (2020), H. 9, DOI: 10.1609/aaai.v34i09.7123.

Bill Tomlinson u. a., "The carbon emissions of writing and illustrating are lower for AI than for humans", in: *Scientific Reports* 14 (2024), Nr. 3732, DOI: <u>10.1038/s41598-024-54271-x</u>.

Alex de Vries, "The growing energy footprint of artificial intelligence", in: *Joule* 7 (2023), H. 10, S. 2191–2194, DOI: 10.1016/j.joule.2023.09.004.
